

Rebecca Rankin

Designer

Profile

I am currently completing my degree in Digital Media Design specifying in web design. This is developing my skills in coding.

As an individual I am not only capable but also confident, and acquaintances have described me as both approachable and reliable.

I particularly enjoy being part of a team whilst also welcoming individual challenges. Taking on responsibilities and adapting to tasks when required has always been one of my best attributes.

Achievements

- ◆ Duke of Edinburgh Bronze and Silver Award
In the process of completing both the Bronze and Silver Duke of Edinburgh's I learned a lot about the value of team work especially for when the team all has the same goals. I find this skill particularly useful when I am in a similar situation. Although through this experience I learned a lot about team work, I also learned about it in Air Cadets that I attended and completed the award with. From completing this and attending Air Cadets I have learned about the hierarchy of individuals within a group and more about strict discipline.
- ◆ World Challenge
For my World Challenge I travelled to Nicaragua for a month. Since I had previously completed my Duke of Edinburgh Awards, I felt at ease working as a team making our way across the volcanoes and when we helped build some classrooms for a school. The most rewarding part of this was going to the school and being able to feel like I had given something back to the community. It was an amazing experience where I was able to get to know a lot of new people and find out a lot about myself in how capable I am.
